

CONSTRUCTION WASTE

ARE YOU READY and COMPLIANT?

Soils | Aggregates | Waste

RAPID TESTING

UNEARTHED WASTE?

Consider any construction waste concerns *immediately*. Our technician can be out to site within 24 hours, taking samples and beginning the test process.

LAB? APPROVED.

With our in-house WAMITAB qualified technicians and our network of approved laboratory testing facilities, we can advise on test types and requirements before conducting the right tests and assessing results to inform the next phase.

RESULTS? RAPID.

Armed with site samples from our same-day inspection, your lab report is available within 24 hours. For you, that means minimum works and schedule disruption, and a clear route ahead for any waste management or remediation

CLEAR ROUTE AHEAD.

Your test results and report will be the steer for how you should manage your site waste. The results will indicate the classification of your soil, and we will be your guide for the appropriate removal, reuse or remediation.

ASSESS & AUDIT.

Assessing and classifying your construction material into the correct EWC codes, we will advise the best course of action with a completely transparent and traceable audit trail for compliance, transfer and tracking.

RESOLVE, LOCALLY.

Your site material, once tested and classified, can now be reused on site; or removed and disposed of at the correct local facility; or readied for recycling where possible. Your MCM technician can quote to remove, dispose and document for quick and compliant management.
